

FACT SHEET

Company Overview

FOR A RICHER EARTH

Objective

Transform the image of mining through environmentally friendly technologies

What we offer

- ✓ Disruptive technology
- ✓ Non-toxic gold leaching reagent
- ✓ The first viable alternative to cyanide
- ✓ Gold recovery rate comparable to cyanide
- ✓ A reusable reagent
- ✓ Low cost scalable processing circuit
- ✓ A complete mobile or fixed processing circuit
- ✓ Simple gold recovery process
- ✓ No toxic tailings or tailings dams

Technology

- ✓ The technology was developed by CSIRO, Australia's premier research agency
- ✓ In conjunction with CSIRO, a demonstration plant was successfully built at Menzies and is currently producing gold
- ✓ Clean Mining Ltd purchased the patented technology from CSIRO
- ✓ Specially formulated reagent and gold recover process
- ✓ Technical expertise to assess deposits and suitability of the technology

Industry benefits

- ✓ Enable gold mining in cyanide banned locations and countries
- ✓ Eliminate toxic chemical risk to humans and environment
- ✓ Enable small gold miners to achieve the same gold recovery rates as large-scale miners but with a lower cost, scalable, mobile processing plant
- ✓ Unlock stranded gold deposit
- ✓ Dry tailings option to eliminate tailings dams
- ✓ Lower compliance costs than cyanide
- ✓ Gold produced can be sold at a premium under the Clean Mining branded bullion.
